## Professional Experience

### Backend Developer (Contract)

**Enclinks – Remote** | October 2025 - Present

- Maintain and enhance client website infrastructure using Laravel PHP, ensuring optimal performance and functionality across all pages
- Implement feature updates and modifications to existing codebase, adapting to evolving client requirements and business needs
- Manage content updates including file uploads, image optimization, and media asset integration to keep website current and engaging
- Conduct thorough testing and quality assurance across all web pages to ensure seamless user experience and identify potential issues
- Collaborate with clients to gather requirements, provide technical recommendations, and deliver timely solutions for website enhancements
- Perform regular site monitoring and maintenance to ensure all functionalities operate correctly and resolve any emerging technical issues

### Backend Developer (Volunteer)

**Open Source Project – Osun, Nigeria** | December 2024 - July 2025

- Co-developed an interactive Complaint Management System using Laravel PHP, architecting backend infrastructure to support multi-user workflows
- Engineered secure authentication system and admin dashboard with complaint review, status tracking, and feedback mechanisms
- Designed and implemented scalable database schemas using Laravel migrations and Eloquent ORM, establishing relationships to ensure data integrity and optimal query performance
- Collaborated with remote development team using Git/GitHub for version control, conducting peer code reviews to maintain code quality
- Applied clean code principles and SOLID design patterns, resulting in maintainable and well-documented codebase

## Backend Developer Intern

**De-Future Elite Technology – Gwarinpa, Abuja | July 2024 - October 2024**

- Completed intensive Laravel PHP training program, mastering backend development fundamentals including OOP, CRUD operations, and data structures
- Developed features using MVC architecture and Laravel Blade templating engine, contributing to multiple internal projects
- Designed and presented UI/UX layout for company internal web page, ensuring alignment with brand guidelines and user requirements
- Delivered assigned development tasks ahead of schedule, demonstrating strong problem-solving abilities and technical communication skills
- Participated in agile development cycles, collaborating with team members to gather requirements and implement iterative improvements

## WordPress Web Developer (Contract)

**Remote | January 2025 - March 2025**

- Developed custom, responsive WordPress website from requirements gathering through deployment, focusing on user experience and modern design principles
- Optimized front-end performance through strategic plugin integration (Elementor), custom HTML/CSS/JavaScript development, and asset optimization, achieving 40%+ improvement in load times
- Implemented responsive design using mobile-first approach and CSS media queries, ensuring seamless experience across all devices
- Delivered comprehensive post-deployment support including technical documentation, client training, and feature enhancements
